

Ballybunion Insignia Defined Returns Fund

Monthly Factsheet – January 2024 – Class B Shares (Euros)

*For qualifying investors only – this is a **capital at risk** investment product which means that clients may lose part or all of their investment and therefore it may not be suitable or appropriate for all potential investors.*

Investment objective and strategy

The investment objective of the Fund is to generate long-term capital growth. The Fund has a target return of 7-9% per annum over rolling five-year periods. It invests in a diversified pool of defined-return equity strategies (structured products) (“Notes”). The Fund aims to produce positive returns in all but extreme negative equity market scenarios.

The Fund will primarily invest in Euro denominated Notes which are structured as autocall or kickout type payoffs. The Fund may also invest in different payoff structures and/or GBP or USD denominated Notes. The Fund can invest in index-based Notes, single and multiple, stock basket-based Notes and single stock Notes. The Fund will usually hold ten to fifteen Notes, with an approximately equal split by notional value and counterparty exposure.

Monthly update

For January the Fund finished fractionally lower with a -0.2% return. For context, the MSCI World Index in USD terms increased 1.1% in January. Europe and Emerging Markets were negative on the month with the US pulling the aggregate up into positive territory.

In January our Banks Note was auto-called, delivering a 14.25% return over a 1-year hold period. We replaced this with a Note containing Roche, Pernod Ricard and Diageo. This has an annual coupon of >15%. We also added additional safety features to capital protect this Note, under certain conditions.

The Fund is well positioned with a good mix of Notes and sufficient cash on hand to profit from opportunity as it presents.

Key facts
