

Ballybunion Insignia Defined Returns Fund

Monthly Factsheet – March 2024 – Class A Shares (Euro)

*For qualifying investors only – this is a **capital at risk** investment product which means that clients may lose part or all of their investment and therefore it may not be suitable or appropriate for all potential investors.*

Investment objective and strategy

The investment objective of the Fund is to generate long-term capital growth. The Fund has a target return of 7-9% per annum over rolling five-year periods. It invests in a diversified pool of defined-return equity strategies (structured products) (“Notes”). The Fund aims to produce positive returns in all but extreme negative equity market scenarios.

The Fund will primarily invest in Euro denominated Notes which are structured as autocall or kickout type payoffs. The Fund may also invest in different payoff structures and/or GBP or USD denominated Notes. The Fund can invest in index-based Notes, single and multiple, stock basket-based Notes and single stock Notes. The Fund will usually hold ten to fifteen Notes, with an approximately equal split by notional value and counterparty exposure.

Monthly update

For March the Fund finished with a +3.2% return. This comes against a 3% increase in the MSCI World Index (in USD terms). There were broad based gains in the Fund with most Notes improving. In particular, our renewables Note gained significant ground. On the flip side, the biggest detractor was a Note containing Boeing.

There were no new trades during March. A number of Notes had autocall observations but did not call and have now rolled forward to their next autocall observation barrier (which is lower) and date.

The end-March NAV is a new high for the Fund which is encouraging. The Fund remains defensively positioned and we have cash to deploy during April as opportunities present.

Key facts

Fund structure	Qualifying Investor Fund
Regulator	Central Bank of Ireland
Fund domicile	Ireland
