

# Ballybunion Insignia Defined Returns Fund

## Monthly Factsheet – March 2025 – Class A Shares (Euro)

*For qualifying investors only – this is a **capital at risk** investment product which means that clients may lose part or all of their investment and therefore it may not be suitable or appropriate for all potential investors.*

### Investment objective and strategy

The investment objective of the Fund is to generate long-term capital growth. The Fund has a target return of 7-9% per annum over rolling five-year periods. It invests in a diversified pool of defined-return equity strategies (structured products) (“Notes”). The Fund aims to produce positive returns in all but extreme negative equity market scenarios.

The Fund will primarily invest in Euro denominated Notes which are structured as autocall or kickout type payoffs. The Fund may also invest in different payoff structures and/or GBP or USD denominated Notes. The Fund can invest in index-based Notes, single and multiple, stock basket-based Notes and single stock Notes. The Fund will usually hold ten to fifteen Notes, with an approximately equal split by notional value and counterparty exposure.

### Monthly update

In March, the Fund decreased by 10%, underperforming the MSCI World Index which declined by 8.3% in Euro terms. As has been the case for most of this year, there was a wide divergence in performance at a regional level.

We added one Note during the month, an Index-based Note with some new defensive features.

### Key facts
